

# ECS PLM Consulting

simplify the complex!

- *You are new to the topic of PLM and planning to introduce a company-wide PLM system?*
- *You have been using PLM for several years and are now looking for potential improvements?*
- *You intend to use PLM to support your new business processes?*
- *You are planning to migrate your PLM system?*

***In either case, ECS is the perfect partner for efficiently supporting your PLM projects and carrying them out on schedule - comprehensively, quickly and successfully!***

## | Our Consulting Services |

The success of our projects is based on the expertise and experience of our long-standing employees who have more than 300 person-years of PLM experience. We support you in the areas of:

- *Balance of PLM strategy with the possibilities of the chosen PLM system*
- *„Project Setup“, hold to the terms and objectives of your PLM project*
- *Preparation of project strategy*
- *Optimizing the requirements*

Another success factor is our proven ECS project methodology. These include:

- *we listen actively*
- *we offer trade-specific PLM consulting based on our comprehensive project experience*
- *we improve your business workflows by making use of the functionality of the new PLM system*
- *we determine with your experts the optimum adjustment between your business processes and adaptations of the PLM system*
- *we place great value on clear and active communication between all parties involved*
- *we define the success of a project not only by the successful introduction of your IT system, we mainly base it on the effective and productive application by the end users*
- *we keep in mind that the introduction or expansion of a PLM system also influences the work processes of users*
- *we support you in carrying out organizational changes (Organizational Change Management)*
- *we are your reliable partner: from the first consultation to the completion of your project*

***We help you divide your complex project into steps that can be managed, planed, accomplished and revised more easily - we "simplify the complex" !***

## | Structured Approach by Best Practice |

We begin with a checklist to determine the current situation and the goals of your project. In cooperation with your experts and based on our templates, we develop a suggestion or concept for the implementation of the tasks to be performed.

Of course, we also focus on your individual requirements in the fields of:

- *parts and BoM management*
- *document management*
- *change management*
- *workflow management*
- *data migration*

The concept resulting from this takes into account the following aspects of your corporate structure:

- *different user groups*
- *system interfaces like ERP / SAP / marketing system*
- *authorizations (Intellectual Property Protection)*
- *business-to-business processes (suppliers, customers)*
- *CAD integration / management*
- *facilities or locations to be integrated*

Based on the concept developed, you can either choose to implement your PLM project on your own or make use of our many years of experience. Our experts will support you in terms of conception, implementation, project management, roll-out, testing and training.

## | Your Benefits |

You will be provided with a cost-effective, timely and high-quality PLM solution by means of:

- *practical support by experienced ECS consultants*
- *sophisticated project methodology*
- *best practice recommendations*
- *simplification of your complex PLM projects through the ECS multi-step concept*
- *reduction of the need for individual programming by application of standard functionalities*
- *safe migration based on proven methods and tools*
